converted shed / summer house -
minimum size D121.92 x W182.88cm

Aviary -
Minimum size D121.92 x W182.88cm

catio -
Minimum size D121.92 x W182.88cm

Dog Kennel -
Minimum size D121.92 x W182.88cm

These are a few outdoor cages which are accepted by our rescue. If you need any more information on these cages please get in touch.

These minimum requirements are to meet two ferrets needed. Ferrets should always have space to express natural behaviours such as running, stretching, happy dancing ect.

We recommend you line any indoor spaces with lino for easy cleaning and always place your enclosure on hard floor such as slabs or concrete.

Ferrets are very good escape artists so all mesh covering encloses should be at least 16g thickness and maximum size 2.5cm

We suggest all enclosures to have locks and secured ventilation .

To fill the enclosure, you can use:

Dust free shavings

straw

blankets/hammocks

litter trays with wood/paper pellets

puppy pads
